

Mechanically releasing fuel tank flap

Remove edge protection and rear panel trim from rear right door pillar. Pull the strap (1) upwards until the tank flap has been released.

Cabrio:

Pull out the plug (1) in the (rear right) cabrio top rail with the strap, until the tank flap has been released.

Short wheelbase Station Wagon with stowage box

Note:

The rear panel securing screw located in the stowage box must be removed, before the rear panel trim can be taken off when mechanically releasing the fuel tank flap.
